

ABOUBAKR IBRAHIM

Biomedical Engineer | Clinical Engineering | Field Service | Medical Device Quality

Istanbul, Türkiye • +90 552 533 7031 • abubakrhse.ah@gmail.com • linkedin.com/in/aboutakr-ibrahim-45435a246

Open to global relocation within one week • Available for frequent field-service travel

PROFESSIONAL SUMMARY

Biomedical Engineer with supervised hands-on internship experience across hospital clinical engineering and X-ray technical-service environments in Egypt and Türkiye. Supported inspection, fault investigation, preventive-maintenance activities and functional verification of critical-care, surgical, imaging and radiography equipment. Trained in ISO 13485:2016 internal auditing, medical-device quality assurance, electrical safety and service documentation. Ready for international relocation and frequent travel for an entry-level Clinical Engineering, Field Service, Biomedical Technician or Medical Device Quality role focused on equipment reliability and patient safety.

TECHNICAL SKILLS

Clinical Equipment	GE CARESCAPE R860 ventilators; patient monitors; defibrillators; anesthesia equipment; infusion pumps; operating tables
Imaging & X-Ray	CT equipment; ultrasound systems; TOPAZ mobile X-ray; GXR U-arm; digital radiography and fluoroscopy fundamentals
Maintenance	Preventive maintenance; fault investigation; functional testing; component replacement; electrical and mechanical inspection; service documentation
Quality & Data	ISO 13485:2016; medical-device QMS; internal auditing; electrical safety; MATLAB; machine learning; healthcare data and FHIR fundamentals

PROFESSIONAL EXPERIENCE

Biomedical Engineering Intern — Clinical Engineering Department Aug-Sep 2023

Cairo University Hospitals | Cairo, Egypt

- Completed a 24-day hospital-based internship supporting biomedical engineering activities across ICU, CCU, emergency, operating-room and imaging departments.
- Assisted with inspection, troubleshooting and maintenance of ventilators, defibrillators, anesthesia equipment, patient monitors, operating tables, ultrasound systems and dental equipment.
- Supported CT troubleshooting involving gantry operation, X-ray tube and power checks, ventilation-fan replacement and functional verification.
- Participated in GE CARESCAPE R860 troubleshooting involving airflow and pressure-sensor faults, and supported ultrasound-probe assessment and operating-table battery replacement.
- Observed new-equipment installation and clinical training, including a defibrillator communication module and SINO SN-1800V infusion pumps; documented technical observations and maintenance activities.

Biomedical Engineering Intern — X-Ray & Radiology Systems Sep-Oct 2022

EKOL Tıbbi Ürünler A.Ş. | Istanbul, Türkiye

- Completed a 20-day internship focused on X-ray and digital-radiography equipment, radiation principles and technical-service workflows.
- Assisted engineers during hospital service visits involving TOPAZ mobile X-ray and GXR U-arm systems.
- Supported fault investigation involving movement and safety-brake sensors, X-ray tube fuses, control boards, motors and mechanical positioning systems.
- Participated in functional verification, recalibration, component replacement and equipment reassembly under engineering supervision.
- Supported service documentation, spare-parts review, warehouse activities and equipment-status tracking.

SELECTED PROJECT

Early Sepsis Detection in ICU Patients Using Machine Learning

Mar–Jul 2025

Işık University | Istanbul, Türkiye

- Developed a MATLAB-based early sepsis risk-screening prototype using de-identified MIMIC-III ICU data.
- Prepared clinical variables and compared Logistic Regression, Random Forest and deep-learning approaches as part of the graduation research workflow.
- Evaluated model behaviour using accuracy, precision, recall, F1-score and confusion matrices, while documenting the need for leakage-safe validation in future development.
- Proposed an ICU monitoring concept connecting biomedical data analysis with clinical workflow and earlier risk recognition.

EDUCATION

Bachelor of Science in Biomedical Engineering — English Program

2019–2025

Işık University | Istanbul, Türkiye

Graduated: 30 September 2025

SELECTED CERTIFICATIONS & TRAINING

- ISO 13485:2016 Medical Device QMS — Internal Auditor | Işık University
- Medical Device Quality Assurance: Ventilators, Patient Monitors, Neonatal Equipment and Electrical Safety | Fluke Biomedical, 2026
- ESA609 Electrical Safety Analyzer and Impulse 7000 Defibrillator Analyzer Training | Fluke Biomedical, 2026
- Medical Device Quality Management and Auditing Basics | Scilife Academy, 2026
- HEARTS Technical Package for Clinicians and Programme Managers | World Health Organization, 2026
- McKinsey.org Forward Program — Problem Solving, Communication and Adaptability | McKinsey.org, 2025
- Healthcare Data, Azure Health Data Services and FHIR Fundamentals | Microsoft Learn, 2026
