

ABOUBAKR IBRAHIM

Biomedical Engineer | Technical Sales | Product Support | Clinical Applications

Istanbul, Türkiye • +90 552 533 7031 • abubakrhzen.ah@gmail.com • linkedin.com/in/aboutakr-ibrahim-45435a246

Arabic-English professional communication • Global relocation and frequent travel available

PROFESSIONAL SUMMARY

Biomedical Engineer combining hospital equipment exposure, X-ray technical-service experience and strong Arabic-English communication. Understands critical-care, surgical and imaging workflows and can translate technical features, safety requirements and maintenance needs into clear customer-facing explanations. Experienced in technical documentation, digital medical-device content and cross-cultural project work across Egypt, Türkiye and Saudi Arabia. Seeking an entry-level Technical Sales, Product Specialist, Clinical Applications or Customer Support role with international travel and growth opportunities.

COMMERCIAL & TECHNICAL CAPABILITIES

Product & Clinical Knowledge	Ventilators; patient monitors; defibrillators; infusion pumps; anesthesia equipment; ultrasound; CT and X-ray systems
Customer Communication	Arabic and English professional communication; technical explanation; active listening; presentation and training support
Sales Support	Needs discovery; product demonstration support; feature-benefit communication; follow-up; service coordination; documentation
Quality & Digital	ISO 13485 awareness; device quality and electrical safety; healthcare data/FHIR fundamentals; LinkedIn technical content

RELEVANT EXPERIENCE

Biomedical Engineering Intern — Clinical Engineering Department

Aug-Sep 2023

Cairo University Hospitals | Cairo, Egypt

- Completed a 24-day hospital internship across ICU, CCU, emergency, operating-room and imaging departments, building practical understanding of users, workflows and equipment requirements.
- Worked around ventilators, defibrillators, anesthesia equipment, patient monitors, operating tables, ultrasound and dental systems and learned to connect technical condition with clinical use.
- Observed structured CT troubleshooting and post-service functional verification, strengthening the ability to communicate technical issues accurately to users and service teams.
- Participated in GE CARESCAPE R860 sensor-fault investigation and supported ultrasound-probe and operating-table assessments, gaining device-specific vocabulary and application insight.
- Observed equipment installation and clinical training involving a defibrillator communication module and SINO SN-1800V infusion pumps; documented user-facing and technical observations.

Biomedical Engineering Intern — X-Ray & Radiology Systems

Sep-Oct 2022

EKOL Tıbbi Ürünler A.Ş. | Istanbul, Türkiye

- Completed a 20-day X-ray and digital-radiography internship covering equipment functions, radiation principles, service workflow and customer-site requirements.
- Joined hospital service visits involving TOPAZ mobile X-ray and GXR U-arm systems and observed engineer-customer communication in the field.
- Developed working knowledge of movement and safety-brake sensors, X-ray-tube fuses, control boards, motors and mechanical positioning systems.
- Supported functional verification, recalibration, component replacement and equipment reassembly under engineering supervision.
- Supported service documentation, spare-parts review, warehouse activities and equipment-status tracking—useful for quotations, follow-up and service coordination.

TECHNICAL COMMUNICATION PORTFOLIO

Medical Device Technical Communication & LinkedIn Content

2026

Independent Professional Portfolio | LinkedIn

- Created educational posts explaining ventilators, patient monitors, defibrillators, infusion pumps, ultrasound and medical-device quality in accessible professional language.
- Connected equipment functions, alarms, sensors, preventive checks and reliability with real hospital workflow and patient-safety needs.
- Achieved more than 7,000 impressions on a ventilator-focused post, demonstrating the ability to attract and engage a relevant healthcare-technology audience.
- Used original field photographs and structured explanations to communicate technical value while protecting confidential and patient information.

EDUCATION

Bachelor of Science in Biomedical Engineering — English Program

2019–2025

Işık University | Istanbul, Türkiye

Graduated: 30 September 2025

SELECTED PRODUCT, CLINICAL & PROFESSIONAL TRAINING

- Medical Device Quality Assurance: Ventilators, Patient Monitors, Neonatal Equipment and Electrical Safety | Fluke Biomedical, 2026
- HEARTS Technical Package for Clinicians and Programme Managers | World Health Organization, 2026
- McKinsey.org Forward Program — Problem Solving, Communication and Adaptability | McKinsey.org, 2025
- ESA609 Electrical Safety Analyzer and Impulse 7000 Defibrillator Analyzer Training | Fluke Biomedical, 2026
- ISO 13485:2016 Medical Device QMS — Internal Auditor | Işık University
- Healthcare Data, Azure Health Data Services and FHIR Fundamentals | Microsoft Learn, 2026
- Medical Device Quality Management and Auditing Basics | Scilife Academy, 2026

COMMERCIAL VALUE

Product explanation • Clinical workflow awareness • Customer needs discovery • Technical documentation • Training support • Cross-cultural communication • Digital content

LANGUAGES

Arabic — Native • English — Fluent • Turkish — Basic, actively improving
